Venue: Exhibition Ground of Halic
Congress Centre Istanbul, Turkey

CONTACT

TOS+H takes place parallel to the International Occupational Safety and Health Conference of the Ministry of Labour and Social Security. That way it affiliates itself to the most important conference in Turkey on labour protection and positions itself as the most important industry platform to reach the responsible decision makers in the industry.

The last major conference was held in 2011: the World Congress for Occupational Safety and Health, which was organised by International Labour Organisation (ILO) together with International Social Security Association (ISSA). Now it is the stated goal to organise an international conference every two years growing on what has been learned from the World Congress and to position itself as a driver of occupational safety not only in Turkey but in neighbouring countries as well.
