

# NEW Solaris Pro and Solaris Pro-X 16K

## 16,000 Lumens - Portable Rechargeable, Programmable LED Lighting System

The Solaris Pro is the latest addition to the renown NightSearcher Solaris floodlight range. It is highly portable, extremely compact and light weight. Due to the multi position telescopic pole and light head, along with stabilising legs it can be used on uneven ground for example a motorway or railway embankment. The 16,000 lumen light output will provide a wide spread of light and can run for up to 48 hours. The control console allows for the running time to be set as needed so that the Solaris Pro will set the light level to last the required time.

NightSearcher

RECHARGEABLE LED FLOODLIGHTS

Pole extends to 1.85 metres

Swivel and tilting head

180°

The power Cord is built into the pole to avoid snags and damage

Self-contained - Collapsible compact unit for easy storage
